

SAFETY ACCESSORIES FOR SVF BALL VALVES

SVF offers a variety of optional accessories to meet plant-wide requirements for safety and accessibility. The most common of these are the Oval Handle, Locking Device and Modular Stem Extensions.

OVAL HANDLE

Ideal for installations throughout the process area. The oval handle is a low-profile operating device that eliminates "lever" action and helps prevent unwanted opening of the valve. Features a vinyl grip wrap over 316 Stainless Steel.

Oval handle option is available for: R8, B8, SB7 and all other "8 Series" SVF ball valves.

SVF Part Number: -OH

LOCKING DEVICE

The SVF locking device option allows valved to be padlocked according to OSHA mandates. Manufactured from 316 Stainless Steel, the design is simple and modular.

Locking device option is available for: R8, B8, SB7 and all other "8 Series" SVF ball valves.

SVF Part Number: -LD

MODULAR STEM EXTENSION

The SVF "*Therma-Safe*"™ stem extension fits on all ISO-style valves. The "bolt-on" design is easy to install and provides rugged attachment for the most demanding operations. Can also be fitted with the locking device option (as shown).

Stem extension option is available for: R8, B8, SB7 and all other "8 Series" SVF ball valves.

Standard overall length: 3.25" (without locking device)

SVF Part Number: -EXT-ISO
